

MOHAMMED UMAIR

Contact No.: +971529482432 | Email: umair9317@gmail.com

Location: Abu Dhabi UAE

FRONTEND DEVELOPER

“Result-oriented IT Development Professional, highly regarded for turning the impossible into possible, overcoming complex business and IT challenges, salvaging and strengthening relationships, rescuing bottlenecks and behind schedules, off-track engagements, and working with the teams to achieve results.”

PROFILE SUMMARY

- **Seasoned and Solutions-Focused Professional with the career advancements of 8 years** in the full software development lifecycle – from concept through delivery of next-generation applications and customizable solutions. Possesses unmatched coding and testing skills to translate the client/business-specific requirements into successful software & systems. Experienced in designing, developing, and implementing applications and solutions using various technologies and programming languages.
- **Remarkable background** in overseeing all software development life cycle aspects, from in-depth analysis and designing to prompt technical support. Significant chunk of exposure in design, development, and management of Java-based applications.
- **Leveraged prowess and perspectives** in driving the development of technical solutions to deliver outstanding scalability & manageability and translate business needs into technical necessities. Skilled in implementing software engineering principles to design, develop, maintain, test, and evaluate computer software.
- **Outstanding excellence in new IT functions** from scratch with technical leadership guided by vision and mission values.
- **Remarkable proficiency in aligning** the business goals with technology solutions to drive process improvements, competitive advantage, and bottom-line gains.

CORE COMPETENCIES

- | | | |
|----------------------------------|-----------------------------------|--------------------------|
| • Strategic IT Planning | • Front-end technologies, such as | • Operational Excellence |
| • Full-stack Development | Angular 13+, React Js, Vue Js | • Team Management |
| • Software Development | • MVC Design Patterns | • Liaison & Coordination |
| • Websites & Mobile Applications | • Accessibility & Security | • Wordpress, WooCommerce |
| • PHP Programming Language | Compliance | • Codeigniter & Laravel |
| • Requirement Gathering | • JavaScript, Typescript | • Github, GitLabs |
| • SQL Databases, Redis | • Backend technologies such as | • Redux |
| • Firebase | Node Js, | |
| | • Process Engineering | |

FUNCTIONAL SKILLS

- Well-versed with various aspects, including:
- Extensive experience with **React.js**, including **state management** using libraries such as **Redux** and **Ngrx**, ensuring scalable and maintainable front-end architectures.
- Proficient in **Angular 19+**, **Ngrx**, **Rxjs**, **Node.js**, and, **ReactJs**, enabling the development of dynamic, component-based, and real-time web applications.
- **PHP web frameworks {such as Codeigniter & Laravel} WordPress, etc. depending on your technology stack}}**
 - Object-oriented PHP programming
 - JavaScript and jQuery
 - Common PHP or web server exploits and their solutions
- Interpreted fully synchronous behavior of core PHP, MVC design patterns, accessibility & security compliance (Depending on the specific project), and front-end technologies (JavaScript, HTML5, and CSS3).
- Hands-on experience in the combining and integrating the multiple data sources and databases into one system
- Conversant with the PHP as a platform and workarounds
- Planned, prioritized, designed, and formulated the database schemas, representing and supporting business processes
- Experienced in SQL databases and their declarative query languages
- Whatsapp Business Management Apis, Whatsapp Cloud Apis

PROFESSIONAL EXPERIENCE

January 2022 - Presently
Smart Works For Information-Abu Dhabi
Full Stack Developer (Angular Developer/.Net Web API/Stored Procedure)

- Developed and maintained **RESTful APIs** using **ASP.NET Core**, adhering to best practices in API design and security.
- Implemented business logic and optimized data access using SQL Server Stored Procedures and Entity Framework Core.
- Built dynamic and scalable front-end applications using Angular, integrating tightly with backend services. Implemented automation workflows and advanced functionality for managing messaging campaigns efficiently.
- **Utilized RxJS** for reactive programming, efficiently handling asynchronous data streams, **API polling**, **debouncing user input**, and real-time data updates
- Followed **SOLID** principles, clean architecture, and component-based design patterns for maintainable and testable code.
- Implemented JWT-based authentication and role-based authorization, enhancing app security..
- Worked in an Agile development environment, participating in sprint planning, code reviews, and daily stand-ups..
- Used Git for version control and Postman/Swagger for API testing and documentation.
- Migrated legacy modules to **Angular 19** using **standalone components**, significantly reducing load time and module dependency complexity.

September 2022 - November 2024
Azmarq Innovations Pvt Ltd -New Delhi
Full Stack Developer (Angular Developer/ReactJs/NodeJS)

- Functioned as a Front-End Developer specializing in **Angular** (Angular 13) and **Node.js** for building and managing scalable web applications.
- Played a significant role in developing the **Azmarq Omni Channel Platform**, a **microservices-based architecture** designed for sending bulk messages via **WhatsApp, SMS, and RCS**.
- Contributed to system and application design, ensuring the platform's scalability, reliability, and seamless user experience.
- Implemented automation workflows and advanced functionality for managing messaging campaigns efficiently.
- Built a **Zoho Extension** enabling bulk SMS and WhatsApp messaging for selected leads using custom APIs.
- Developed a **Automated Web Flow Builder** using **React.Js** and **NodeJs**, allowing users to create and manage automated workflows.
- Designed the application using **HTML5, CSS3**, and Bootstrap to ensure a responsive and visually appealing user interface.
- Created a **WordPress WooCommerce Plugin** for seamless integration with WooCommerce.
- Applied robust **security measures** on both the frontend and backend, including implementing **CSRF tokens** for protection against cross-site request forgery, **JWT-based authentication**, **input validation**, and **secure API communication**.
- Worked extensively on understanding and integrating **WhatsApp Business API** for enterprise-level communication solutions.
- Present ideas and experience to new development solutions. Provide support in development processes and techniques.
- Utilized **MongoDB** as the primary database for storing structured data and **Redis** as a secondary database to optimize performance and enable fast data querying, essential for handling large volumes of data efficiently in messaging services.
- Presented ideas and provided support for new development solutions, processes, and techniques.

March 2022- August 2022
Abaris Softech Pvt. Ltd. -New Delhi
FrontEnd Developer (ReactJs/NodeJS)

- Design user interactions on websites, develop servers and databases for website functionality and code for mobile platforms.
- Built an **online bidding platform** for a Canadian client using **ReactJs** and **Node.js**, enabling **live bidding**, **automatic bidding**, and **manual bidding** functionalities powered by **Socket.IO**, all managed through a robust admin panel.
- Utilized **SQL** as the database to store and manage bidding-related data efficiently, ensuring real-time data synchronization and integrity.
- Formulated and implemented front-end architecture using **React Js**, creating intuitive and responsive user dashboards.
- Developed and maintained back-end functionality with **Express.js** and **Node.js**, ensuring seamless communication between components.
- Designed the application using **HTML5, CSS3**, and Bootstrap to ensure a responsive and visually appealing user interface.
- Developed and maintained **eCommerce** websites on **WordPress**, including implementing **WooCommerce** for online stores and **integrating payment gateways**.
- Customized WordPress themes and plugins to meet specific client requirements and optimize functionality.

May 2020-March 2022
Almspay – New Delhi, DL
Chief Technology Officer (CTO) / Full Stack Developer (Angular/Node.js)

- Led the design, development, and launch of **Almspay**, a mobile app specifically designed to facilitate online donations and payments for Masjids, streamlining the process for users and administrators alike. Handled the end-to-end back end (Admin Panel) on **Node Js and Angular-13**
- Engineered the integration of the **Razorpay payment gateway** with customized payout profiles, ensuring that donations made by users were directly transferred to the respective Masjid's account securely and efficiently.
- Architected and managed the end-to-end back-end systems, including the Admin Panel, using Node.js and Angular 2, ensuring a secure and efficient payment processing workflow.
- Designed the application using **HTML5, CSS3**, and Bootstrap to ensure a responsive and visually appealing user interface.
- Implemented **Firebase Cloud Functions** for serverless architecture, enhancing the app's scalability and reducing operational costs.
- Provided ongoing technical support post-launch, resolving any issues promptly and optimizing app performance based on user feedback.
- Ensured secure handling of sensitive user data and compliance with payment industry standards, safeguarding both donors and Masjid accounts.

August 2019 – May 2020
Vtech Serve. – New Delhi, DL
FrontEnd (Angular Developer)

- Played a pivotal role in managing the website built on **Angular** and **Node.js**.
- Designed and developed a **job portal** using Angular for the front end and Node.js for the back end, leveraging **MySQL** for database management.
- Developed an **employer panel** using **Laravel** to efficiently manage recruitment workflows.
- Designed the application using **HTML5, CSS3**, and Bootstrap to ensure a responsive and visually appealing user interface.
- Built an **eCommerce store on Wordpress** and customized the WooCommerce plugin to dynamically display prices based on user location, ensuring tailored pricing for different markets.
- Handled the user dashboard front end using Angular 2 and the back end on Express.js, delivering a seamless and intuitive user experience.

May 2018-July 2019
LEX EMPRESA Infotech Pvt. Ltd. – New Delhi, DL
Senior PHP Developer

- Built numerous **WordPress websites** and developed multiple **core PHP** projects using **jQuery** and **JavaScript**
- Led the development of **Indian Film Zone**, utilizing Angular for the front end and creating APIs in core PHP while working at the client's office in Mumbai.
- Designed and managed PHP applications for portal and premium service platforms, ensuring performance and scalability.
- Collaborated with the UX team to create innovative applications and ensured consistent validation for HTML5, CSS3, and JavaScript.
- Refactored and scaled existing codebases, enhancing functionality and maintainability.
- Documented processes, ensured feature quality with test-driven development, and provided post-launch support.
- Stayed updated on web development trends to deliver modern, efficient solutions.
- Deployed and implemented standard development tools to develop and handle the applications.
- Recorded a rise in existing data services API and implemented the data services.
- Steered the end-to-end web application development life cycle right from the concept stage to delivery and post-launch support.
- Played a stellar role in refactoring, enhancing, and augmenting the existing codebase for maintenance and scale.

April 2015 – May 2016
A J INFOTEK – New Delhi, DL
Php Developer

- Developed **eCommerce websites** and websites for **educational institutions**, meeting diverse client needs. Entrusted with the overall accountability of formulating the efficient, testable, and reusable PHP modules.

- Built **ePrayoglekha**, a product enabling online practicals for schools and colleges, using **PHP, jQuery, AJAX, Mysql Database**.
- Integrated user-facing elements developed by front-end teams into functional systems.
- Formulated efficient, testable, and reusable PHP modules.
- Addressed, analyzed, and resolved all the performance problems and architectural challenges.
- Incorporated and combined all the data storage solutions.

EDUCATION CREDENTIALS

- **Bachelor of Computer Applications**, from Jamia Hamdard University: IT in 2010.
- **New Horizon School** – New Delhi, DL. Completed in 2007
